

New E1E Ergo Stairclimbers

Only From... **b&p Manufacturing**
Engineered Delivery Products

The E1E represents a breakthrough in stair climber design!

Slight angle with 10" wheels

Here's why:

- * A more vertical geometry requires less bending and less driver effort to go up and down stairs.
- * Extruded aluminum design is our strongest yet.
- * Works with 8" and 10" wheels
- * Can be mounted on existing hand trucks.
- * Mounting holes for E46 kick bar and E47 extractor are built in. No mounting plates are required.
- * Uses standard 2002-164 wear strips.

***2 Year Warranty On All
"Made in the USA"
B&P Products!***

***Straight up and down
with 8" wheels***

***New disc brake applications,
require part # 2002-E1EB***
