

Keg Hauler

The KEG-1 attaches easily to 60" bulk delivery carts to allow your drivers to carry up to six kegs, safely. High strength, extruded aluminum tubing is formed to fit standard U.S. half barrels and will last a lifetime.

Hand slots make for easy and fast installation and removal and tabs on the ends keep the KEG-1 securely in place. Unique base captures any debris, condensation or leakage and prevents it from getting on customers floors.
