

Liberator Convertible Hand Trucks

Junior **Liberator** Convertible
B70-C6-D5

Senior **Liberator** Convertible
A13-B81-C6-D5

All **Liberator** convertibles feature heavy duty components and 4 sided cross members, assembled with aircraft grade rivets. Provide the highest capacity and longest life, guaranteed.

- 600 lbs. capacity in upright position and 1,200 lbs. in lay down. Competitors are 500 lbs./1,000 lbs.
- Sr. models feature 5 cross members and Jr. models feature 4. This adds to frame rigidity and capacity and helps keep smaller objects from falling through.
- One piece heavy duty steel lock bar prevents premature wearing.
- Wheel brackets are high strength extruded aluminum. Won't crack or gall out like cast ones.
- Powder coated swivel/slide tubes won't bind like plated designs.
- Swivel brackets are 11 gauge cold rolled steel for superior strength.
- High tensile steel axle is standard.
- Steel, not plastic spacers and plates.

- Casters are smooth rolling, long lasting TPR and feature one wing brake standard.
- Large selection of accessories are available to customize your convertible.
 - * Folding noses for taller loads.
 - * Solid and perforated decks. (permanent and snap on) keep objects from falling through.
 - * Stair climbers (sr. only) help going up and down stairs.
 - * Wings increase the frame width with minimal additional weight.
