

Handles

In 2014, Engineers at B&P Manufacturing modified our most popular aluminum handles to create a stronger and more wear resistant handle than prior alloys. After our handles are welded they are heat treated from a 6061-T4 to a 6061-T6 aluminum; making them 50% stronger and 60% more wear resistant than any other handle available.

Easily recognizable by the wide, flat horizontal tube at the top of the handle; our handles are perfect for two-handed operation -- making them ideal for use on steep inclines or steps.

Available Handle Styles

Flared Double Pin Grip

Available in 48", 52" 55" & 62"

Vertical Grip

Available in 52", 60" & 68"

Loop

Available in 50"

Single Pin Grip

Available in 52", 55", 62" & 68"

Horizontal Grip

Available in 62"

Double Vertical Grip

Available in 55", 62" & 68"

Double Flared Loop Grip

Available in 55" & 60"
