

# Nose Plates

- Extruded aluminum brackets won't crack or break.
- Beveled to inside of frame to eliminate gaps which allow for play and loosening up over time.
- Extruded aluminum or steel for heavier duty applications.
- All extruded aluminum nose plates are deburred making it easier to slide under loads.
- Some models available with cutouts to lighten the overall weight of the hand truck.
- Available in a variety of sizes to suit every application.
