

Universal Bulk Delivery Cart

- Our uniquely designed square handles are heat treated to be the strongest in the industry.
- Handles are assembled with much stronger military grade rivets which won't loosen up or break apart.
- Sturdier center strap and cross members to resist bending.

- Formed decks eliminate welds and seams down the sides which can crack and peel up over time like on some competitors carts.
- Full perimeter caster plates versus smaller corner caster plates which can break off.
- Two full length support stringers under the deck at caster plates like on some competitors carts.
- Corner pockets are also fully welded on inside versus spot welded to prevent from breaking off.
- Heavy duty 8" polyurethane rigid casters in the center where durability is needed most, and 8" TPR swivel casters on corners.

| P/N | Description | Center Wheels | Casters | Width x Length | Weight | Capacity |
|-------|------------------------------|-----------------|-------------------|----------------|--------|-----------|
| FHM-1 | Universal Bulk Delivery Cart | 8" Polyurethane | 8" Corner Casters | 18" x 60" | 95 lbs | 1,200 lbs |
